

2-4-9 Planning Sheet for Community Service Group Project

Instructor will work with kids to fill this out and create a plan for your community project.

1. The population (group of people) or community we want to help:
2. The specific need or issue facing this population or community that we want to help with: (hunger, crime, poverty, bullying, recovery from natural disasters, gun violence, climate change, local site clean-up needed, etc.)
3. The length of time that this population or community has been dealing with the need/issue:
4. ONE way in which we could help with the problem:
(Be sure to explain how your idea/plan will actually help people.)
5. Resources we need in order to help with the problem and carry out the plan. If applicable, describe *how* you will gather the necessary resources. For example, you may need volunteers (kids and/or adults), certain supplies, donations of goods or money, information or materials provided by an organization already working on this issue, etc.
6. Steps we need to take to carry out this plan:
7. Estimate of how long it will take to put this plan into action and/or complete this plan:
(It's possible some projects may be on-going in nature, and so you won't be able to come up with a timeframe for when they ultimately will be completed.)
